COMING SOON

The China International Center for Chronic Disease Prevention will host its two annual events in early June 2011 in Changde, Hunan Province; instead of holding them in the fall or winter as has occurred in previous years.

The 3rd Annual Forum on the Prevention and Management of Non-communicable Disease Prevention was held at Peking University Health Science Center in December 2010. The theme was ‘Population Salt Reduction and Chronic Disease Prevention’. Attendees at the forum also witnessed the launch of China Rural Health Initiative. LifeSeeds, a large-scale multi-centre international project supported by China Ministry of Health, The George Institute’s China Rural Health Initiative called LifeSeeds, is one of two projects of chronic public health needs – reducing cardiovascular disease and improving health management in China’s rural villages. LifeSeeds is built in partnership with The China Rural Health Initiative, The University of Queensland, Australia, Duke University, USA, and The George Institute for Global Health, China.

The burden of cardiovascular diseases, including acute coronary syndrome (ACS), is increasing. Coronary heart disease (CHD) is now a leading cause of morbidity and mortality and is estimated to be the cause of death of at least several hundred thousand people and more than 10 percent of all deaths in low- and middle-income countries. The situation is expected to worsen in the future due to changing lifestyles, increased obesity, and a growing population. The importance of CHD is increased by the extremely high level of salt consumption and the high deaths from CHD. The participants reached a consensus that the impact of a multi-sectoral approach to CHD prevention is crucial for effective and efficient policy recommendations regarding salt reduction and related disease control.

THE SECOND ANNUAL FORUM ON SALT REDUCTION AND CHRONIC DISEASE PREVENTION

The Second Annual Beijing Chronic Disease Management and Prevention Forum was held at Peking University Health Science Center on February 14, December 2010, with the theme “Population Salt Reduction and Chronic Disease Prevention.”

To tackle the high salt intake problem and related diseases, the forum invited both nationally and internationally renowned experts to give speeches on topics like “salt and health,” “global salt reduction initiatives,” and approaches to reduce salt intake. The attendees also witnessed the launch of the China Rural Health Initiative called WULONG, which is a large-scale multi-centric international project supported by the Chinese Academy of Health.

CLINICAL PATHWAYS IN ACUTE CORONARY SYNDROMES (CPACS) STUDY PROGRESS UPDATE

The thread of cardiovascular diseases, including acute coronary syndrome (ACS), is increasing. Coronary heart disease (CHD) is now a leading cause of morbidity and mortality and is estimated to be the cause of death of at least several hundred thousand people and more than 10 percent of all deaths in low- and middle-income countries. THE TERRACOTTA WARRIORS FUNDRAISING EVENT FOR THE LIFESEEDS PROJECT IN SYDNEY

The evening of Monday, December 13, 2010 saw the first fundraising event of the George Institute for global health, China take place at the George Institute, Australia, hosted the Terracotta Warriors event at the Art Gallery of New South Wales.

It was an opportunity to showcase the great work being done for the Institute’s China office. Guests included several influential members of the Chinese Government, Chinese and Australian business leaders, Chinese-Australian community leaders, and high-profile media such as SBS, Phoenix TV and Australian News Express Daily.

The program included the traditional Qian Music, followed by speeches from Institute leaders, a special address from Mr. Wang, Deputy Consul-General of China and a lucky draw from Professor Wang GM, Vice Chairman of the Standing Committee, China National People’s Congress was read by Professor BV Yang Feng, the Director of the George Institute, China. After the speeches, guests were treated to a private viewing of The First Emperor’s Terracotta Warriors. The night finished with a silent auction led by Dr. Cindy Pan.

Cut Sugary Drinks, Cut Childhood Obesity: Children Swallow a Lesson in Healthy Drinking

The Second Annual Beijing Chronic Disease Management and Prevention Forum was held at Peking University Health Science Center on February 14, December 2010, with the theme “Population Salt Reduction and Chronic Disease Prevention.”

To tackle the high salt intake problem and related diseases, the forum invited both nationally and internationally renowned experts to give speeches on topics like “salt and health,” “global salt reduction initiatives,” and approaches to reduce salt intake. The attendees also witnessed the launch of the China Rural Health Initiative called WULONG, which is a large-scale multi-centric international project supported by the Chinese Academy of Health.

The participants resolved a consensus that the impact of a population-wide salt reduction in China is important considering the high salt consumption and the high number of blood pressure related diseases in China. The participants urged a concerted multi-sector effort to promote population salt reduction.
